

Instructions

1. Change the "Continue on to Summit.org" **text**.
2. Change the **URL** for the "Continue on to Summit.org" text.
3. Change the **title** of the webpage to "[your website's title]: Christians Need to Vote".

Please Note: This html file contains embedded JavaScript code that will dynamically change what image is used for the heading; based on what day it is. If it is November 2nd, the web page will automatically load the "today.gif" as the header image, which says: "The Election is Today!". On all other days the web page will just automatically load the "tomorrow.gif" image, which says: "The Election is Tomorrow!". We are assuming you won't be using this page until the day before the election.

If you have any difficulty configuring or setting these things up, contact us:
